- Service Assist Card

Live GPS & Speed Request

Request and receive the real time speed of your vehicle.

Handover your car keys with confidence, knowing you can check in with your vehicle at any time.

Check in on the driver of your vehicle using your smartphone to show the real time current speed of your vehicle.

Have confidence knowing your car is in safe hands, or whether you need to take action.

All in real time.

Live Vehicle Location GPS

Live GPS Updates from anywhere, right from your Smartphone

Using your smartphone view live GPS tracking data showing your vehicle's current location, direction and heading.

Perfect for keeping track of who is driving your vehicle from family, friends or co-workers.

Even when you are the driver, you can still see all the live GPS data from your smartphone, even including where you parked your car.

Forget searching Airport, Shopping Centre or Stadium car parks forever.

All in real time.

Trip Start & Trip End Points

Get detailed driving reports on your vehicles activity, whether or not you are the driver.

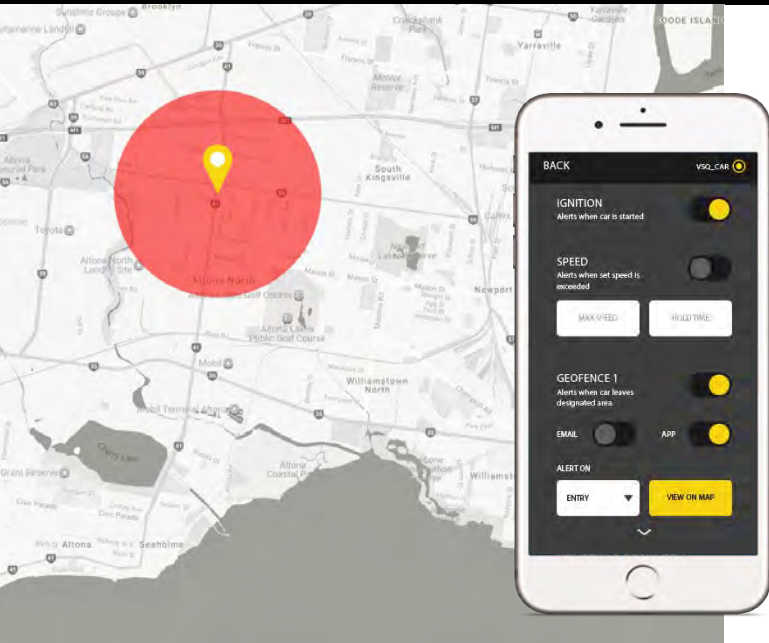

Whether your vehicle is being driven from point to point or over short, medium, and long haul trips, we will keep track of all the details in between.

From streets, routes, highways and everything in between, Viper's Advanced Telematics Engine, will keep track of your vehicle every second you are on the road.

Get access to Detailed Reports Including Start and End Points, Start Times and End Times, your complete journey information is available for quick and easy review.

Includes all GPS location, speed and travel information.

Geofence Alert*

Automatic Alerts when your vehicle enters or exits a designated area.

A Geofence is a virtual perimeter for a real-world geographical area. Using the Viper GPS Tracking App, select from a 250m radius Geofence all the way through a 20km radius for your Geofence boundary.

Viper GPS Tracking will automatically alert you the second your vehicle breaches the established Geofence boundaries.

Enjoy peace of mind when leaving your keys with a third party, for example Mechanic, Parking Attendant or even friends and family.

** Available in the Premium Subscription Only*

Harsh Braking/Acceleration*

Get an alert on aggressive or unsafe driving.

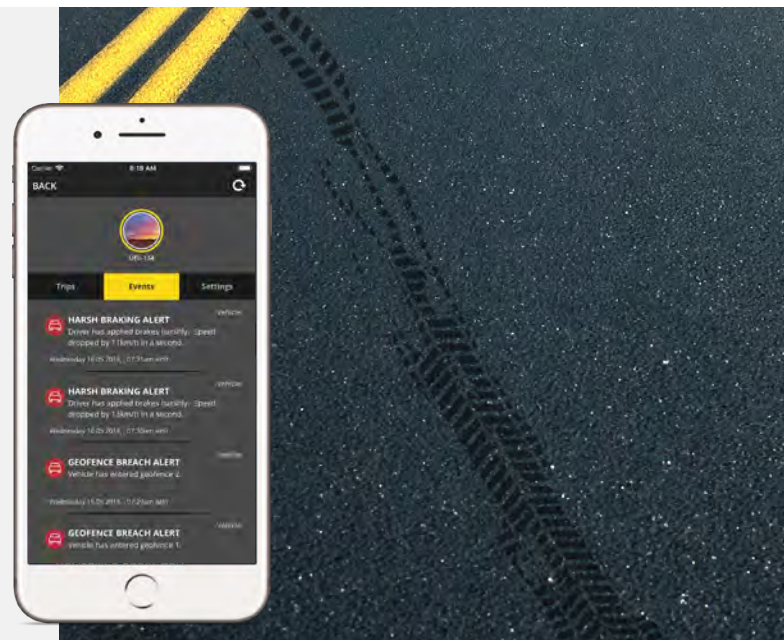

Harsh Braking/Acceleration wears down vehicle parts more rapidly and increases the amount of downtime for vehicles.

Harsh Braking/Acceleration events at highway speeds are a more serious matter.

Prevent stress on the vehicle, receiving a notification every time your vehicle brakes/accelerate harshly.

Protect Your Car. Protect Your Family.

** Available in the Premium Subscription Only*

Low-Battery Alert

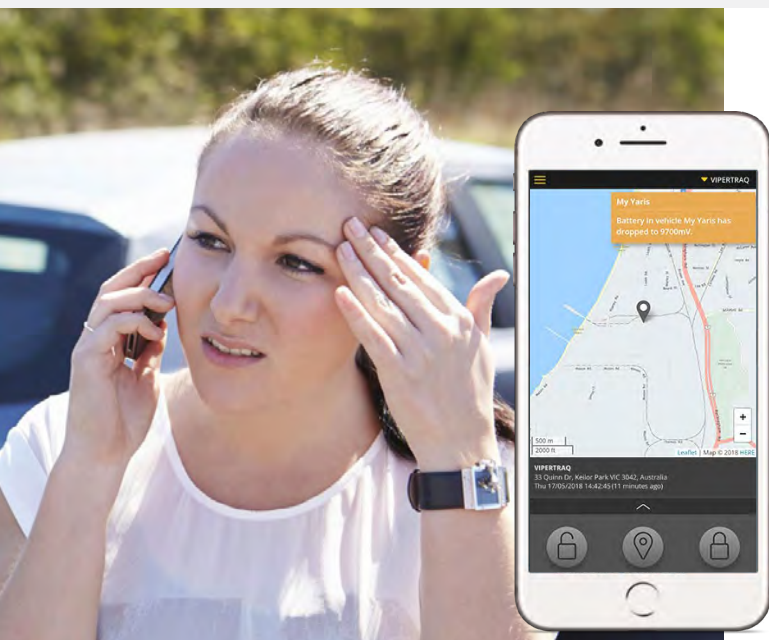

Your battery is monitored prompting an alert when getting low.

Your vehicle's battery is like its heart: your vehicle needs the power from it to start and move.

Nowadays, vehicles are drawing power even when parked, especially if it has on-board computers with sophisticated memory settings and sensors.

When the battery is getting low, our Viper App will send you a low-battery alert, giving you the opportunity to take corrective action.

No more surprises when you next go to start your vehicle.

Live Ignition Status

Remotely check your vehicle's ignition status, when you are away from your vehicle.

Is your vehicle turned off and parked, or is it turned on and driving?

No matter, wherever you are, you can at anytime remotely check in and see the ignition status of your vehicle using your smartphone. Quickly and Easily.

Remote Start, Lock & Unlock Your Car*

No Matter How Far Away You Are From Your Vehicle

Lost your keys?

Cold and raining outside?

Family Member locked out of your vehicle?

With the integration of your Viper 5 Series or ESP2 Compatible Alarm, simply use the Viper App on your smartphone to remote start, remote lock and unlock your vehicle.

** Available in the Premium Subscription Only*

Lockdown Feature*

No Matter How Far Away You Are From Your Vehicle.

You've put a lot of work into acquiring your car and you don't want someone to take it.

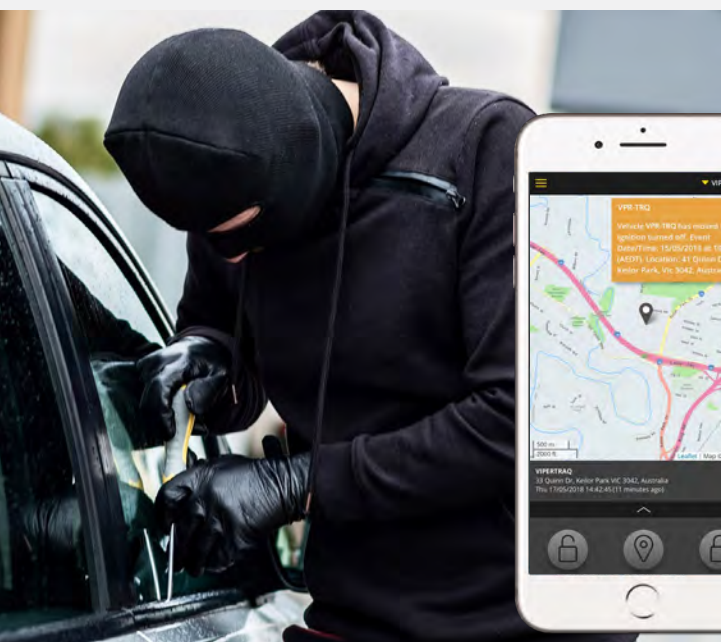

How to protect your ride?

This feature protects against towing and theft.

You will receive immediate alerts if the ignition position is moved, likewise if the vehicle is moved from its current position, you will also receive an immediate alert.

Now you can enjoy a greater peace of mind.

** Available in the Premium Subscription Only*

Automotive Grade, High Performance Hardware

Using superior design and Automotive Grade Components, VIPER® GPS Tracking has been built using only the latest technologies, all with efficient digital circuit design.

Our entire development and manufacturing processes are strictly controlled by our ISO9000 Quality Management System.

Coupled with our In-House SMT Manufacturing Line, we guarantee that only the Highest Quality and Highest Performing Products are delivered.

- National 3G Network coverage (Telstra)
- External GPS antenna for better location accuracy
- Built in battery backup
- Built in SIM card
- Designed and Manufactured in Australia
- 12V & 24V Operation

Accessories Provided

- VIPER® GPS Tracking Module
- GPS Antenna Module

- Service Assist Card

Hardware in Detail

<p>01</p>	<p>02</p>	<p>03</p>	<p>04</p>	<p>05</p>
<p>Automotive Grade Components</p>	<p>Back-up Battery</p>	<p>External GPS Antenna</p>	<p>Telstra 3G Sim Card</p>	<p>ESP2 Security Communication</p>

AEC-Q200 Automotive Grade Components are the industries' most stringently controlled for quality and performance.

An integrated Lithium Polymer battery provides back-up power when your main car battery is disconnected.

Included GPS Antenna is minimal in size and provides the best signal strength for superior location accuracy.

Embedded Telstra Sim Card into Hardware Unit*. No need to purchase additional Sim Card.

Exclusive to VIPER®, ESP2 is a high speed, extra ultra security communication between devices, that delivers many of VIPER's key features.

*Annual subscription required to activate SIM card. Works with 3G/4G networks.

Flexible Annual Subscription Packages.

*Enhanced/extended features subject to subscription plan chosen.
